

JFST MINI PROJECT

Title :

Event Planning website using concepts of JFST. Name of the website – Event Curators.

Team Members :

Sakshi Gurav – UCE2021526

Aditi Hinge – UCE2021527

Shruti Koshti – UCE2021534

Neha Mahajan – UCE2021536

Technologies Used :

- 1) HTML : To design the web pages.
- 2) CSS : To style the pages. We have used inline, internal and external css.
- 3) JavaScript : Used to provide functionalities to the webpages and validate input fields eg. email, password etc.
- 4) JSP : To make the web page dynamic. Used for search and filter functionality. Used for fetching data from a database.
- 5) JDBC : Used along with JSP to connect databases and web pages.
- 6) Servlets : Used for authentication and registration. Database interaction.
- 7) MySQL : Used to store user data in tables.
- 8) JQuery : Used for animations.

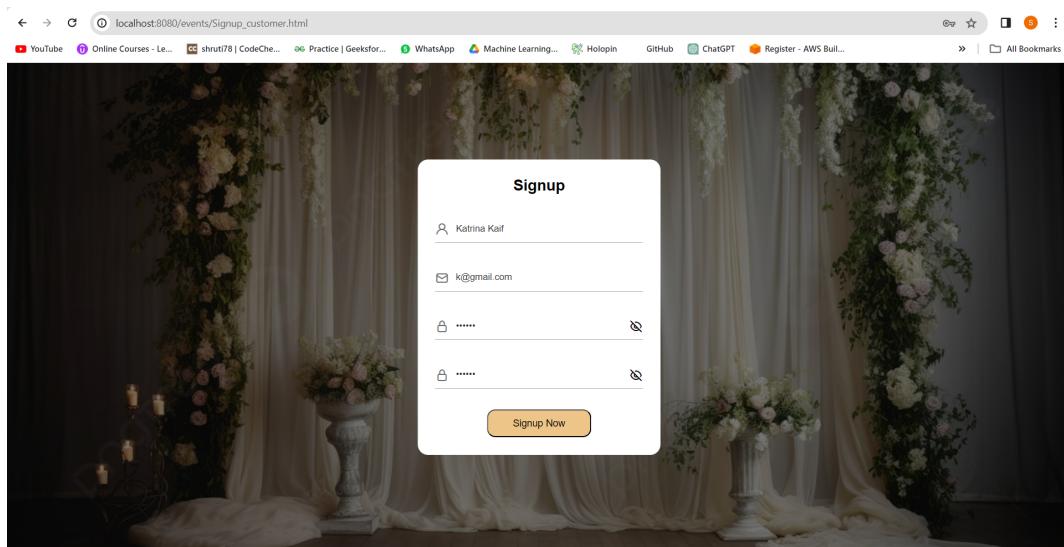

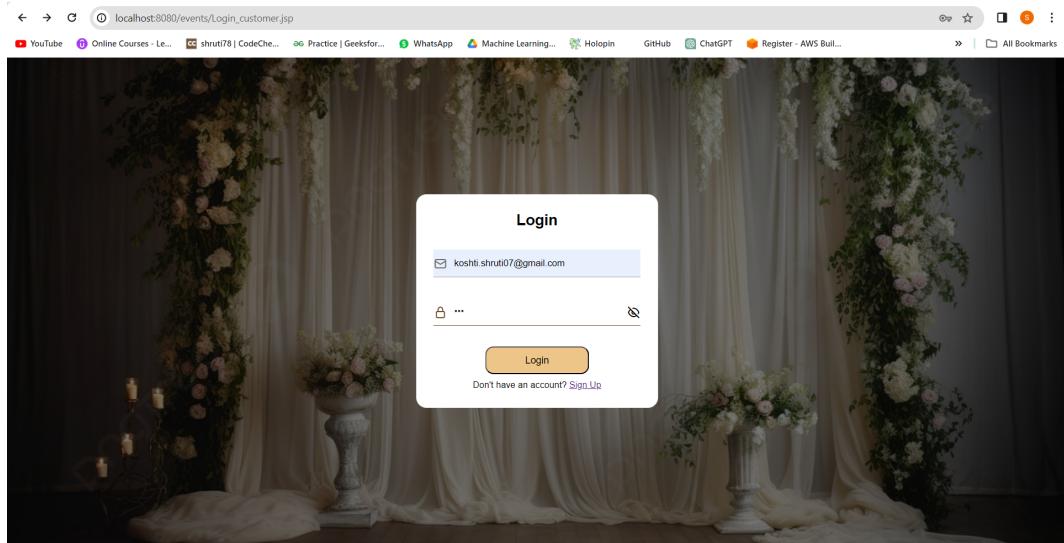

Functionality :

- 1) Login & SignUp – User is first shown the login page from which he/she can redirect themselves to the signup page if they don't have an account. Entered details are checked with the database and if all the details match then the user is directed to the homepage.
- 2) Select event – Users have the freedom or flexibility to select the event they want to plan. Once they select an event they are redirected to the details page where they have to select their venue, date, time, decorations etc.
- 3) Select venue – User has the option to select a venue from the dropdown list as per his requirement. We have included venues from 2 different cities. Venues have a decent price range to fit everyone's budget.
- 4) Budget Management – Users can select decorations and venues as per their budget.
- 5) Timeline and scheduled planning – Users can select a venue for either the morning slot(9am to 3pm) or the evening(5pm to 10pm) slot or both.
- 6) Customized decoration – Users have the options to select the decoration which they like. Decorations have a wide price

range to fit the needs of every user. Users also have an option of not selecting any decorations.

- 7) Customized menu – Users can select the dishes from a dropdown list and customize their food platter. Dishes range from starters and soup to dessert.
- 8) Payment modes – Users can choose among multiple options to pay etc. card, GPay. This page redirects the user to the respective payment modes.
- 9) Feedback and contact services – Users can provide feedback on the services of the website through the “Reviews” page. Users can find ways to reach us using our email and phone number displayed on the “Contact Us” page where.
- 10) Know more about us – Users can know more about the website, the mission of the planners and portfolio of the planners through the “About Us” page.
